

Sustainability and Communities of Place

Studies in Environmental Anthropology and Ethnobiology

General Editor: **Roy Ellen**, FBA

Professor of Anthropology, University of Kent at Canterbury

Interest in environmental anthropology has grown steadily in recent years, reflecting national and international concern about the environment and developing research priorities. This major new international series, which continues a series first published by Harwood and Routledge, is a vehicle for publishing up-to-date monographs and edited works on particular issues, themes, places or peoples which focus on the interrelationship between society, culture and environment. Relevant areas include human ecology, the perception and representation of the environment, ethno-ecological knowledge, the human dimension of biodiversity conservation and the ethnography of environmental problems. While the underlying ethos of the series will be anthropological, the approach is interdisciplinary.

Acknowledgements

I would like to thank the Secretariat of the XV International Union of Anthropological and Ethnological Sciences Congress, held in Florence, Italy, in July 2003, with the theme of “Humankind/Nature: Past, Present and Future,” for support of the session that would bring together the various authors in this volume for two days of presentations, discussions, and conviviality.

I am grateful to Marion Berghahn for her encouragement and support during the entire process of putting this book together. I would like to express my gratitude to Michael Dempsey and Melissa Spinelli, Production Managers at Berghahn Books in New York, and to copyeditor Lori Rider, for expert guidance on editorial matters. Thanks also to Roy Ellen, who provided a critical reading of an earlier version of the manuscript, and to Barbara Yablon Maida for her close structural reading of earlier versions of each of the essays in this volume and for her creative support during the editing of this book.
