

# Acknowledgments

---

Many of the articles collected here were first presented at the “Cultures of Technology and the Quest for Innovation” conference, which I organized at the Kulturwissenschaftliches Institut (KWI) in Essen, Germany, in April 2003. The conference was sponsored by the Alfred and Cläre Pott Stiftung. I want to thank Jörn Rüsen, the Director of the KWI, and his staff for providing us with excellent facilities and with the time required for some intense and stimulating discussions.
