Wiebe E. Bijker is professor of technology and society at the University of Maastricht, Netherlands. He was trained as a physicist, and has a Ph.D. in the sociology and history of technology. He was president of the Society for Social Studies of Science.

Delphine Gardey is historian and researcher at the Centre de Recherche en Histoire des Sciences et des Techniques, CNRS/Cité des Sciences et de l'Industrie, Paris. Her work concentrates on gender history, gender and technology, gender and science, and office technologies.

Thomas Hughes is Mellon Professor Emeritus of the history and science at the University of Pennsylvania and Distinguished Visiting Professor at the Massachusetts Institute of Technology. His most recent books include *Rescuing Prometheus*, *American Genesis*, and *Human-built World*.

Patrick Kupper is research associate at the Institute of History at the ETH Zurich. His field of work is history of technology and science and environment.

Joachim Nettelbeck studied jurisprudence and sociology in Freiburg and in Berlin. He was administrative director of the Technical College of Economics in Berlin and the chair's assistant and Director of the Press Office and Publicity of German Academic Exchange Agency (DAAD). He has been the secretary of the Wissenschaftskolleg zu Berlin since its founding.

Helga Nowotny is director of the "Society in Science. The Branco Weiss Fellowship" at the ETH Zurich and chair of the European Research Advisory Board of the European Commission. She is professor of social studies of science at ETH Zurich and director of Collegium Helveticum. She was awarded the Bernal Prize by the Society for Social Studies of Science and has published widely in the social studies of science and technology and on the relationship between science and society.

John V. Pickstone trained in biomedical sciences before moving to the history and philosophy of science, and to the social history of medicine. For many years he directed the Centre for the History of Science, Technology, and Medicine at the University of Manchester, where he is now Wellcome Research Professor. He is working on the recent histories of medical technologies and of cancer services, and on a series of essays developing the arguments of his book on *Ways of Knowing*.

Jean-Jacques Salomon is Honorary professor of technology and society at the Conservatoire National des Arts et Métiers, Paris. He founded and directed the OECD Science and Technology Policy Division and wrote many publications on the relations between science and society. His most recent books include *Survivre à la science: Une certaine idée du futur* and *Le scientifique et le guerrier*.

Hans Ulrich Vogel is professor of Chinese history and society at Tübingen University, Germany. His work concentrates on the economy, society, science, and technology of traditional China, especially salt production, mining, monetary policy, and metrology. He is currently chair of the Tübingen Post-Graduate Research Program Global Challenges – Transnational and Transcultural Approaches and editor of the journal *East Asian Science, Technology, and Medicine*.

Judy Wajcman is professor of sociology at the Research School of Social Sciences, Australian National University. Her most recent book is *TechnoFeminism*.

Rosalind Williams is the Metcalfe Professor of writing and the head of the program in science, technology, and society at the Massachusetts Institute of Technology. Her research focuses on the cultural history of technology, and her most recent book is *Retooling: A Historian Confronts Technological Change*. She is president of the Society for the History of Technology.
