

## Instructions for Zine binding!

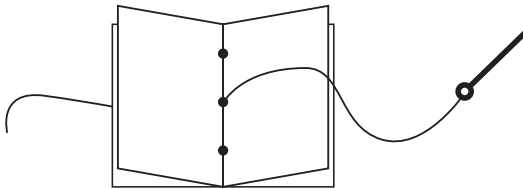

1. Cut a piece of thread approximately three times the length of your zine's spine. Place the thread into the eye of your needle.

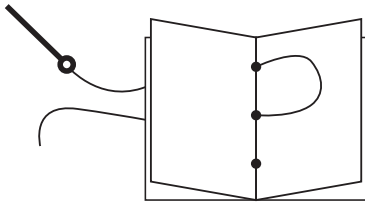

2. Using your awl, punch 3 holes, evenly distributed along the inside spine of your zine.

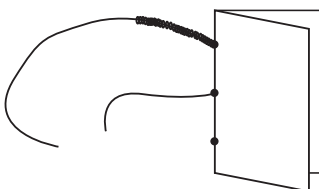

3. Thread the needle through the center hole from the outside of the zine toward the inside.

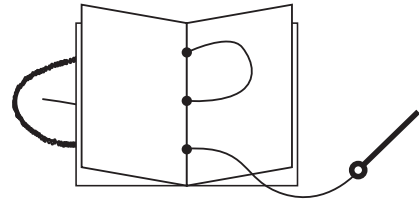

4. Then back out again, through the top.

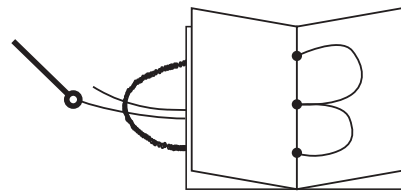

5. Place your beads along the spine of the book. Keep adding them until you've reached the length of the top hole to the bottom hole.

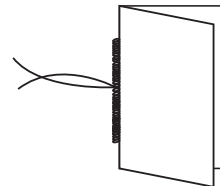

6. Place the needle through the bottom hole, going from outside to inside.

7. Then back out again through the center hole, from inside to outside.

8. Pull it taught, and tie it all together. Make the knot thick enough so that it doesn't slip through the hole. You can reinforce the knot by tying it to the thread with the beads on it.

9. You can cut some of the thread down, and Voila! All done.
